

Strider the Sneezing Dog

By Trace

Do you have a dog that can sneeze ten times in a row? I do, this is how he did it.

It was early Saturday evening. My parents had hired a sitter and were about to go to dinner. They told Marrisona, who at the time was our sitter, the directions to cook the pizza, then left. I was about to turn on the Wii, when my brother spouted, "We forgot to walk the dog!"

We quickly explained the situation to Marrisona and got the okay. All she said was, "Do it fast or you'll have to eat a cold supper."

We were back in a flash and ate dinner, which was still warm. Then all of a sudden, Strider, our dog, started sneezing! He went running. Then he sneezed again and again. I tried to wipe his nose but he just ate the tissue. After seven more times he stopped and like on cue, Mom and Dad came home. We told them all about our strange adventure with the dog and we still laugh about it today.
